

Assignment 1 - Project Plan and Requirements

Team 11

January 20, 2026

1 Project Vision

1.1 1.5 Vision Statement

For online communities and niche interest groups who primarily engage on their phones, our product is a mobile-first discussion platform focused on fast, readable, threaded conversations. The system provides lightweight communities (subforums), posts, comments, voting, ranking (hot/new/top), search, and basic moderation—optimized for small screens and touch interaction. Unlike bloated, ad-heavy platforms, our solution prioritizes speed, clarity, and low cognitive load on mobile, with short load times, clean layouts, and predictable navigation. A well-defined API enables future native mobile clients, notifications, and third-party integrations without redesigning the core system.

1.2 1.4 Success metrics

The project will be considered successful if it achieves:

- 100 new user signups per month during the first 6 months after launch, primarily from mobile devices.
- 3,000 monthly active users by the end of the first year, indicating sustained mobile usage rather than one-time visits.
- At least 30 active communities, each averaging 10 or more weekly interactions (comments, votes, replies), demonstrating that users actively participate in discussions through their phones.
- Consistent mobile engagement patterns, such as frequent short sessions and repeat daily usage, showing that the platform fits naturally into users' everyday mobile habits.

1.3 2.3 Scope of subsequent releases

The first version focuses strictly on core mobile functionality: communities, posts, comments, voting, ranking, search, and simple moderation. Later releases will expand the mobile experience incrementally based on user needs and usage data. Planned future features include:

- Advanced Moderation (Mobile-friendly): reporting flows, user bans, and moderation actions designed for quick use on a phone.
- Mobile UX & Engagement:
 - Image, video, and link posts optimized for vertical scrolling
 - Push notifications for replies, mentions, and community updates

- Direct messages and user profiles with activity summaries
- Dark mode (potentially included in MVP)
- Social login (Google, GitHub, etc.) for fast mobile onboarding
- Community Growth Features:
 - Community rules, themes, and flair optimized for mobile display
 - Cross-posting between communities
 - Pinned posts and event discussions designed to stay visible on small screens

All features will be introduced step-by-step, with a strong emphasis on maintaining simplicity, performance, and usability on mobile devices.

2 Product Backlog

Below is the prioritized backlog with user stories: Note what kind of priority system is used. In order? grouped? Is a lower number higher priority? (Recommended to group and use lower number = higher priority; E.g. P1 is higher priority than P2).

- **User Story 0 [US0; P1]:** As a registered user, I want to Sign up so that I can access the services and with my new account.
- **User Story 1 [US1; P1]:** As a registered user, I can log in so that I can access my account and personalized feed.
- **User Story 2 [US2; P1]:** As a user, I can browse posts in a feed (Hot/New/Top) so that I can discover content.
- **User Story 3 [US3; P1]:** As an authenticated user, I can create a text post in a community so that I can share ideas and start discussions.
- **User Story 4 [US4; P1]:** As a user, I can create a new community so that I can start discussions around a specific topic.
- **User Story 5 [US5; P2]:** As a user, I can join or leave a community so that my feed reflects my interests.
- **User Story 6 [US6; P2]:** As an authenticated user, I can comment on a post so that I can participate in discussions.
- **User Story 7 [US7; P2]:** As an authenticated user, I can create a link post so that I can share external content with a community.
- **User Story 8 [US8; P2]:** As an authenticated user, I can attach an image to a post so that I can share visual content.
- **User Story 9 [US9; P2]:** As an authenticated user, I can upvote or downvote posts and comments so that higher-quality content is ranked more prominently.
- **User Story 10 [US10; P2]:** As a user, I can search for communities, posts, or users so that I can quickly find relevant content.

- **User Story 11 [US11; P3]:** As a user, I can view another user's profile so that I can see their posts and activity.
- **User Story 12 [US12; P3]:** As a moderator, I can remove posts or comments in my community so that community rules and content quality are maintained.
- **User Story 13 [US13; P3]:** As a mobile user I want to take a photo directly using my phone's camera when creating a post so that I can quickly share visual content without leaving the app.

3 User Story Estimates

Below is the estimation table for user stories using the PERT formula: Note down what size you're using for estimates. Is it person days, or work hours?

User Story	Best Case (h)	Most Likely (h)	Worst Case (h)	PERT Estimate (h)
US0 – Sign up	4	6	10	6.3
US1 – Login	4	6	10	6.3
US2 – Browse Feed	6	10	16	10.3
US3 – Create Text Post	6	8	14	8.7
US4 – Create a Community	6	10	18	10.7
US5 – Join / Leave Community	4	6	10	6.3
US6 – Comment on post	4	6	10	6.3
US7 – Create A link post	4	6	10	6.3
US8 – Create a media post	6	10	16	10.7
US9 – Vote (up/down)	4	6	12	6.7
US10 – Search content	8	12	20	12.7
US11 – View User Profile	4	6	10	6.3
US12 – Basic Moderation	6	10	18	10.7
US13 – Take photo	6	10	18	10.7

4 Project Schedule

Below is the schedule for the 10-week project timeline (starting the week after assignment 1 turn-in): Note that there are 4 sprints, one for each assignment. Sprint 1 is two weeks, Sprint 2 and Sprint 3 are three weeks, and the final sprint is two weeks. Decide who is going to be the P.O. for each of the sprints. **This is a template for a schedule, adjust as needed.**

Week	User Stories	Expected Hours	P.O. (Initials)	Sprint	Consultation
1	None	0	ALLIR	1	A1 Presentation
2	US1, US2, Android skeleton	16,6	ÓVD	1	Model Drafts
3	US3, US4	19.4	ÓVD	2	A2 Presentation
4	US5	6,3	JOJ	2	Dev support
5	US6	6.3	JOJ	2	Dev support
6	US7, US8	17	JOJ	3	A3 Presentation

7	US9, US10	19.4	SBS	3	Dev support
8	US11, US 12	17	SBS	3	Dev support
9	US 13	10,7	Allir	4	Final sprint start
10	Bug fixes	10	Allir	4	Final presentation
